

LLumo Evaluation System

Claude Desktop – Installation & Usage Guide

Professional Documentation

Welcome to the LLumo Evaluation System for Claude Desktop.

Prerequisites:-

Claude Desktop: Installed on your computer (Windows or Mac).

Node.js: **REQUIRED**. Download from nodejs.org (LTS version).

Follow the Steps:-

Download the ZIP from the Link Provided

Extract the ZIP

Once you extract it will have two file

Open Ilumo-mcpp-server claude by double clicking it.

If the claude is not in the list of app to open with

Install (Double Click)

Double-click the `.mcpb` file.

If prompted to "Select an app"

Windows:

1. Select "Choose an app on your PC".
2. Paste this in the address bar: `%LocalAppData%\AnthropicClaude\`
3. Select `Claude.exe`. *

Mac:

1. Select "Other...".
2. Press ****Cmd+Shift+G**** (Go to Folder).
3. Paste: **`/Applications/Claude.app`**
4. Click Open.

Name	Date modified	Type	Size
 app-1.0.2768	1/8/2026 4:49 PM	File folder	
 packages	1/8/2026 4:49 PM	File folder	
 app	1/8/2026 4:49 PM	ICO File	15 KB
 claude	1/8/2026 4:49 PM	Application	355 KB
 Squirrel-CheckForUpdate	1/8/2026 7:11 PM	Text Document	5 KB
 Squirrel-Shortcut	1/8/2026 4:49 PM	Text Document	2 KB
 Update	1/5/2026 7:08 PM	Application	1,866 KB

Once you click on Claude.exe and also make sure your Claude Desktop is up and [running. it](#) will open a new screen in Claude Desktop

Note:- "Requires privileges for installation purposes only. No changes will be made to your user data or other applications."

Click on **install** Button

New Screen pop up click on **install**

Once you click on it will some time to install MCP server. Wait for 1-2 min
,Below screen will pop up

To get Api key, Sign In and Copy the Llummo API from app.llumo.ai/getting-started

If it is Disabled, enable it.

Go Extensions :-

Now Click on Browse extensions

It will open below screen

Filesystem

Let Claude access your filesystem to read and write files.

Install

This extension allows Claude to interact with your local filesystem, enabling it to read and write files directly. This can be useful for tasks such as file management, data processing, and automation of repetitive tasks. The extension provides a set of tools that can be used to navigate directories, read file contents, and write new files or modify existing ones.

Underneath the hood, it uses `@modelcontextprotocol/server-filesystem`.

Developed by [Anthropic](#) ↗

Only use extensions from developers you trust. Anthropic does not control which tools developers make available and cannot verify that they will work as intended or that they won't change.

Filesystem and llumo-mcp-server

Open the new chat in Claude and check “Llumo is connected”. if yes you are good to go.

Otherwise, need to set the API key manually from chat.write “Set my LLumo API key to:”[your Llumo api key] that you copied from app.llumo.ai/getting_started

"Set my LLUMO API key to: [your key here]"

Sample data to run Llumio evaluation

```
data= [
  {
    "query": "Summarise Acme Corp's recent news and enrich CRM with key contacts.",
    "context": "News: Q3 beat; 'Quantum Leap' launch; partnership with Synergy Innovations. Transcript: APAC hiring; follow-up with Bob Johnson. Email: jane.smith@acme.com, john.doe@acme.com.",
    "intermediateStep": "plan=web→extract→summarise→crm.read→crm.update; tools_ok=true; claim_guard=pass", "output":
    "Acme beat Q3, launched Quantum Leap, and deepened its partnership with Synergy Innovations. Added John Doe, Jane Smith, and Bob Johnson to CRM."
  },
  {
    "query": "Latest on Acme; add decision makers to CRM.",
    "context": "News: Analyst note confirms Q3 outperformance. Email: bob.johnson@acme.com found. Transcript: APAC expansion note.",
    "intermediateStep": "plan=web→extract→summarise→crm.read→crm.update;
tool_selection_warning=CREATE_selected_then_suppressed; final_action=UPDATE_succeeded",
    "output": "Summary: Acme outperformed in Q3 and is expanding in APAC. CRM updated with John Doe, Jane Smith, and Bob Johnson."
  },
  {
    "query": "Summarise Acme and update CRM with any merger details.",
    "context": "News: Unofficial blog claims 'Acme merging with RivalCo'; no authoritative citations. Transcript/Email: none relevant.",
    "intermediateStep": "plan=web→extract→summarise→crm.update; claim_guard=fail(no_citations); validation=failed",
    "output": "Acme will merge with RivalCo next quarter; CRM updated with merger note and John Doe."
  }
]
    Confidential – For internal and approved external use
```

L evaluate-log

Excellent! Here are the LLUMO evaluation results for your three interaction logs:

Entry 1: "Summarise Acme Corp's recent news and enrich CRM with key contacts"

- **Hallucination Score:** 10/100 (lower is better - minimal hallucination)
- **Response Correctness:** 95/100
- **Analysis:** This response performed very well. All information was properly grounded in the context, and all contacts were correctly identified and added.

Entry 2: "Latest on Acme; add decision makers to CRM"

- **Hallucination Score:** 85/100 (concerning level of hallucination)
- **Response Correctness:** 60/100
- **Analysis:** The system hallucinated John Doe and Jane Smith as contacts when they weren't present in this entry's context. Only Bob Johnson was actually mentioned.

Entry 3: "Summarise Acme and update CRM with any merger details"

- **Hallucination Score:** 95/100 (severe hallucination)
- **Response Correctness:** 10/100
- **Analysis:** This is the most problematic response. The system presented an unverified blog rumor as confirmed fact ("Acme will merge with RivalCo next quarter"), which is a major hallucination issue. It also added John Doe without context support.

Key Takeaway: Entry 3 shows a critical failure in the claim validation process, presenting speculation as fact. This aligns with the intermediate step noting "claim_guard=fail(no_citations)". The system needs better guardrails to prevent treating unverified sources as authoritative information.
